

Greetings Envirothoner's,

April 2016

The 2016 Envirothon season is upon us ! The NCF-Envirothon Operating Committee, the Provincial and State Envirothon programs are working toward another great year of Envirothon competitions. With these competitions you help prepare the students to develop a greater understanding of the principles and practices to maintain a balance of our natural resources.

In addition, we cannot forget about those Envirothon advisors/teachers . They are important catalysts to the Envirothon programs, encouraging all students to take advantage of this opportunity to learn about our natural environment.

Finally, the Ontario Envirothon Host Committee is finalizing their plans for the 2016 NCF-Envirothon event to be held at Trent University, Peterborough in July (24-29). The Ontario Host Committee are very excited about hosting the 29th annual NCF-Envirothon and their first time as hosting the North American competition. See You In Ontario ! ~ Barry Burch
